

LINK TO LIVES

About Us

Have you ever walked around and visited places and wondered who that person was mentioned on the headstone or plaque and what their past or life story was?

Well, we thought it would be a good idea if there was a way for you and anyone to easily access your loved ones website, historical facts and their lives.

With the ability to access this information via smartphones becoming easier and utilising QR technology along with laser etched discs, anyone with a dedicated website or tribute page and having headstones, plaques or a suitable location, will be able to install them, allowing instant access to all the history and associated stories of those much cherished and loved.

So, we offer a simple way and guidance to help you complete this task and get your QR disc ordered.
